8. Precautions

- (1) Read the instructions carefully before using the power supply.
- (2) Check if your input socket can withstand the maximum current.

9. Packaging, transportation, storage

(1) Packaging

The packing box contains the product name, model, manufacturer's logo, inspection certificate from the manufacturer's quality department, and the date of manufacture.

(2) Transportation

MODEL: ΑΡ-ΡΕ2200-48 ΑΥΤΟΜΑΤΟΣ ΦΟΡΤΙΣΤΗΣ ΜΠΑΤΑΡΙΩΝ 2200W48V

It is suitable for the transportation of cars, boats, and airplanes. It should be covered, protected from sun, and handled carefully during transportation.

(3) Storage

When the product is not in use, it should be stored in a packing box. The ambient temperature of the warehouse is $-40 \,^{\circ}$ C to $+70 \,^{\circ}$ C and the relative humidity is 5% to 95%. No hazardous gas, flammable, explosive products and corrosion are allowed in the warehouse Chemical products without strong mechanical vibration, shock and strong magnetic field. The packaging box should be at least 20cm high from the ground and at least 50cm away from the wall, heat source, window or air inlet. The storage period under these conditions is generally 1 year, the inspection should be repeated after 1 year.
