

Check Remarks before use

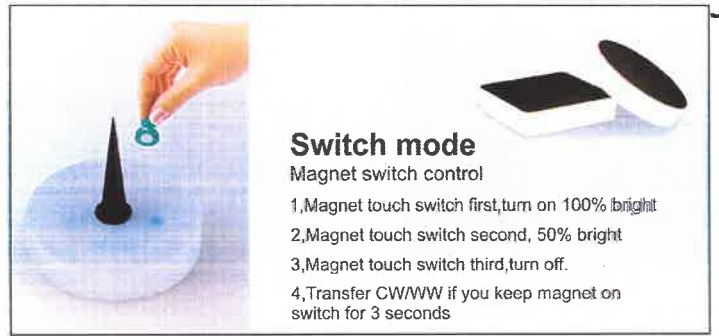

1. Place lamp under sunshine for 4-6h after you get goods and turn on, because it only reserve part energy in battery.
2. The less time to charge under sunshine, the less time to work at night, Working time depends on surrounding, geography latitude, seasons etc.
3. There is the difference of working time and brightness extent for different light, please note.
4. Please clean the panel and in case of poor charging effect if it happen to have obstacle in panel in using.
